Subject Index of Volume 39

Acetaldehyde
  and carboxylic acid, Co-catalysed reductive carbonylation of methyl esters to, 261
Acetate
  and iodide, effect of on catalyst activity and stability of Rh-catalysed methanol carbonylation to acetic acid at low water concentrations, 115
Acetic acid
  Rh-catalysed methanol carbonylation to, at low water concentrations; effect of iodide and acetate on catalyst activity and stability, 115
Acid catalysis
  homogeneous, kinetic analysis of, in chloromethylation of toluene, 105
Acyclic terpenes
  stereochemical features of Pd-catalysed allylic carbonylation of, 355
Albumin
  recycling of NAD^+ crosslinked to, or haemoglobin immobilized with multienzyme systems in artificial cells, 147
Alcohols
  bis(salicylaldehyde)ethylenediimine Co(II)-catalysed oxidative carbonylation of 1-adamantylamine in; study for optimising carbamate formation, 71
  2-butanol; quantum chemical model of dehydration of, catalysed by zeolite X, 169
  C_3; homologation of; homogeneous catalysis of $CO–H_2$ reactions, 93
  methanol;
    homologation; reaction analogous to; Co-catalysed reactions of methoxysilanes with $CO/HSiEt_3$, 237
    Rh-catalysed carbonylation to acetic acid at low water concentrations; effect of iodide and acetate on catalyst activity and stability, 115
    –water mixture on platinized Cr_2O_3-doped TiO_2; photoassisted hydrogen production from, 43
  secondary; Ru(III)-catalysed oxidation of, by *N*-methylmorpholine *N*-oxide, 203
Alkanes
  reaction of neopentane and hydrogen on oriented and non-oriented catalysts of Pt on Al_2O_3, 293
Alkenes, Olefins
  1,4-alkadienes; metathesis of, over $CsNO_3—Re_2O_7—Al_2O_3$ catalyst, 369
  cyclohexene; oxygen atom transfer in epoxidation of, catalysed by Ru(III)—EDTA, 331
  dihydrogen reduction of nitroaromatics, alkynes, aromatic carbonyls and, by *ortho*-metalated Pd(II) complexes in homogeneous phase, 279
  1-hexene; hydroformylation of, by soluble and zeolite-supported Rh species, 243
  hydrogenation of, and alkynes in presence of $Ru(COD)(PMePh)_3^+$; comparison with $RuH(PMe_2Ph)_5^+$ alkyne hydrogenation catalyst, 313
  olefinic substitution reaction catalysed by sulphur-containing polymeric Pd complexes, 55
Alkynes
  and alkenes, hydrogenation of in presence of $Ru(COD)(PMe_2Ph)_3^+$; comparison with $RuH(PMe_2Ph)_5^+$ alkyne hydrogenation catalyst, 313
  nitroaromatics, alkenes and aromatic carbonyls, dihydrogen reduction of by *ortho*-metalated Pd(II) complexes in homogeneous phase, 279
Aluminium
  influence of Si/Al ratio on catalytic properties of NiH mordenite in disproportionation of toluene, 269
  metathesis of 1,4-alkadienes over $CsNO_3—Re_2O_7—Al_2O_3$ catalyst, 369

© Elsevier Sequoia/Printed in The Netherlands

reaction of neopentane and hydrogen on oriented and non-oriented catalysts of Pt on Al_2O_3, 293
Amines
bis(salicylaldehyde)ethylenediimine Co(II)-catalysed oxidative carbonylation of 1-adamantylamine in alcohol; study for optimising carbamate formation, 71
cyclic; Ru-catalyzed carbonylation of, 233
Ru(III) and Ru(III)—EDTA catalysed oxidation of diethylamine by molecular oxygen, 323
Arenes
hydrogenation of, by $RhCl_3$–Aliquat® 336 catalyst; selective reduction of polycyclic compounds, 185
Aromatic compounds
arenes; hydrogenation of, by $RhCl_3$–Aliquat® 336 catalyst; selective reduction of polycyclic compounds, 185
catalytic asymmetric hydrosilylation of ketones by Rh(I) complexes containing enantiomers of (*R**, *R**)-(±)-1,2-phenylenebis(methylphenylarsine) and their phosphorus isosteres, 155
dihydrogen reduction of nitroaromatics, alkenes, alkynes and aromatic carbonyls by *ortho*-metalated Pd(II) complexes in homogeneous phase, 279
effect of dibenzophosphole on catalytic activity of rhodium phosphine complexes, 79
hydrogenation of alkenes and alkynes in presence of $Ru(COD)(PMe_2Ph)_3^+$; comparison with $RuH(PMe_2Ph)_5^+$ alkyne hydrogenation catalyst, 313
o-xylene; liquid-phase oxidation of; product distribution and mechanism, 359
pyrazole-type ligands; hydrogenation catalysts based on pentamethylcyclopentadienyl rhodium complexes with, 341
selective partial hydrogenation of *N*-substituted-3-carbamoylpyridinium salts to corresponding dihydropyridines catalysed by bis(dimethylglyoximato)chloro(pyridine)cobalt, 219
toluene:
influence of Si/Al ratio on catalytic properties of NiH mordenite in disproportionation of, 269
kinetic analysis of homogeneous acid catalysis in chloromethylation of, 105
Artificial cells
recycling of NAD^+ crosslinked to albumin or haemoglobin immobilized with multienzyme systems in, 147
Ascorbic acid
Ru(III)—EDTA catalyzed oxidation of, by hydrogen peroxide in aqueous solution, 139

Caesium
metathesis of 1,4-alkadienes over $CsNO_3$—Re_2O_7—Al_2O_3 catalyst, 369
Carbamate
optimising, formation; bis(salicylaldehyde)ethylenediimine Co(II)-catalysed oxidative carbonylation of 1-adamantylamine in alcohol, 71
Carbon monoxide
Co-catalysed reactions of methoxysilanes with $CO/HSiEt_3$: reaction analogous to methanol homologation, 237
homogeneous catalysis of CO–H_2 reactions; homologation of C_3 alcohols, 93
Carbonylation
bis(salicylaldehyde)ethylenediimine Co(II)-catalysed oxidative, of 1-adamantylamine in alcohols; study for optimising carbamate formation, 71
Co-catalysed reductive, of methyl esters to acetaldehyde and carboxylic acid, 261
Rh-catalysed methanol, to acetic acid at low water concentrations; effect of iodide and acetate on catalyst activity and stability, 115
Ru-catalysed, of cyclic amines, 233
stereochemical features of Pd-catalyzed allylic, of acyclic terpenes, 355
Carbonyls
aromatic; dihydrogen reduction of nitroaromatics, alkenes, alkynes and, by *ortho*-metalated Pd(II) complexes in homogeneous phase, 279

hydrosilylation reactions catalysed by decacarbonyldimanganese(0), 1
Carboxylic acid
Co-catalysed reductive carbonylation of methyl esters to acetaldehyde and, 261
Catalytic properties
influence of Si/Al ratio on, of NiH mordenite in disproportionation of toluene, 269
Chloromethylation
of toluene, kinetic analysis of homogeneous acid catalysis in, 105
Chromium
photoassisted hydrogen production from methanol–water mixture on platinized Cr_2O_3-doped TiO_2, 43
Cobalt
bis(salicylaldehyde)ethylenediimine Co(II)-catalysed oxidative carbonylation of 1-adamantylamine in alcohol; study for optimising carbamate formation, 71
Co-catalysed reactions of methoxysilanes with $CO/HSiEt_3$: reaction analogous to methanol homologation, 237
Co-catalysed reductive carbonylation of methyl esters to acetaldehyde and carboxylic acid, 261
molecular orbital study of cobalt–oxygen interaction, 21
selective partial hydrogenation of *N*-substituted-3-carbamoylpyridinium salts to corresponding dihydropyridines catalysed by bis(dimethylglyoximato)chloro(pyridine)cobalt, 219
Cofactor recycling and regeneration
recycling of NAD^+ crosslinked to albumin or haemoglobin immobilized with multienzyme systems in artificial cells, 147
Cyclic amines
Ru-catalysed carbonylation of, 233
Cyclohexene
oxygen atom transfer in epoxidation of, catalysed by Ru(III)—EDTA, 331

Decomposition
accelerated, of active phosphates on TiO_2 surfaces, 347
Dehydration
quantum chemical model of, of 2-butanol catalysed by zeolite X, 169

Enantiomers
catalytic asymmetric hydrosilylation of ketones by Rh(I) complexes containing, of (*R**, *R**)-(±)-1,2-phenylenebis(methylphenylarsine) and their phosphorus isosteres, 155
Epoxidation
oxygen atom transfer in, of cyclohexene catalysed by Ru(III)—EDTA, 331
Esters
acetate; Rh-catalysed methanol carbonylation to acetic acid at low water concentrations; effect of iodide and, on catalyst activity and stability, 115
ethyl 3-butenoate; hydroformylation of, catalyzed by Pt–Sn complexes; metals in organic syntheses, 177
methyl; Co-catalysed reductive carbonylation of, to acetaldehyde and carboxylic acid, 261

Haemoglobin
recycling of NAD^+ crosslinked to albumin or, immobilized with multienzyme systems in artificial cells, 147
Homologation
of C_3 alcohols; homogeneous catalysis of $CO–H_2$ reactions, 93
methanol; reaction analogous to; Co-catalysed reactions of methoxysilanes with $CO/HSiEt_3$, 237
Hydroformylation
of ethyl 3-butenoate catalysed by Pt–Sn complexes; metals in organic syntheses, 177
of 1-hexene by soluble and zeolite-supported Rh species, 243
Hydrogen
dihydrogen reduction of nitroaromatics, alkenes, alkynes and aromatic carbonyls by *ortho*-metalated Pd(II) complexes in homogeneous phase, 279
homogeneous catalysis of $CO–H_2$ reactions; homologation of C_3 alcohols, 93
photoassisted, production from methanol–water mixture on platinized Cr_2O_3-doped TiO_2, 43
reaction of neopentane and, on oriented and non-oriented catalysts of Pt on Al_2O_3, 293

Hydrogen peroxide
Ru(III)—EDTA catalyzed oxidation of ascorbic acid by, in aqueous solution, 139
Hydrogenation
of alkenes and alkynes in presence of $Ru(COD)(PMe_2Ph)_3^+$; comparison with $RuH(PMe_2Ph)_5^+$ alkyne hydrogenation catalyst, 313
of arenes by $RhCl_3$–Aliquat® 336 catalyst; selective reduction of polycyclic compounds, 185
catalysts based on pentamethylcyclopentadienyl rhodium complexes with pyrazole-type ligands, 341
selective partial, of *N*-substituted-3-carbamoylpyridinium salts to corresponding dihydropyridines catalysed by bis(dimethylglyoximato)-chloro(pyridine)cobalt, 219
Hydrosilylation
catalytic asymmetric, of ketones by Rh(I) complexes containing enantiomers of (*R**, *R**)-(±)-1,2-phenylenebis(methylphenylarsine) and their phosphorus isosteres, 155
reaction catalysed by decacarbonyldimanganese(0), 1

Imines
bis(salicylaldehyde)ethylenediimine Co(II)-catalysed oxidative carbonylation of 1-adamantylamine in alcohol; study for optimising carbamate formation, 71
Immobilization
recycling of NAD^+ crosslinked to albumin or haemoglobin immobilized with multienzyme systems in artificial cells, 147
Iodide
Rh-catalysed methanol carbonylation to acetic acid at low water concentrations; effect of, and acetate on catalyst activity and stability, 115
Isosteres
catalytic asymmetric hydrosilylation of ketones by Rh(I) complexes containing enantiomers of (*R**, *R**)-(±)-1,2-phenylenebis(methylphenylarsine) and their phosphorus isosteres, 155

Ketones
catalytic asymmetric hydrosilylation of, by Rh(I) complexes containing enantiomers of (*R**, *R**)-(±)-1,2-phenylenebis(methylphenylarsine) and their phosphorus isosteres, 155
quantum chemical study of interactions of, with zeolites, 13
simple, TPD/MS studies of interaction of with ZSM-5 zeolites, 195

Manganese
hydrosilylation reactions catalysed by decacarbonyldimanganese(0), 1
Metathesis
of 1,4-alkadienes over $CsNO_3$—Re_2O_7—Al_2O_3 catalyst, 369
Microheterogeneous systems
titanium dioxide-based; specific analysis of surface-bound peroxides formed during photoinduced water cleavage in, 63
Molecular orbital study
of cobalt–oxygen interaction, 21
Mordenite
influence of Si/Al ratio on catalytic properties of NiH mordenite in disproportionation of toluenes, 269
Morpholine
N-methylmorpholine *N*-oxide; Ru(III)-catalysed oxidation of secondary alcohols by, 203
Multienzyme systems
recycling of NAD^+ crosslinked to albumin or haemoglobin immobilized with, in artificial cells, 147

NAD^+
recycling of, crosslinked to albumin or haemoglobin immobilized with multienzyme systems in artificial cells, 147
Neopentane
reaction of, and hydrogen on oriented and non-oriented catalysts of Pt on Al_2O_3, 293
Nickel
influence of Si/Al ratio on catalytic properties of NiH mordenite in disproportionation of toluene, 269

Olefins: see Alkenes
Oxidation
catalytic, reactions of hydrocarbons; application of NMR in studies of elementary interactions in, 85

liquid-phase, of *o*-xylene; product distribution and mechanism, 359
Ru(III)-catalysed, of secondary alcohols by *N*-methylmorpholine *N*-oxide, 203
Ru(III)—EDTA catalysed, of ascorbic acid by hydrogen peroxide in aqueous solution, 139
Ru(III) and Ru(III)—EDTA catalysed, of diethylamine by molecular oxygen, 323
Oxygen
atom transfer in epoxidation of cyclohexene catalysed by Ru(III)—EDTA, 331
–cobalt interaction; molecular orbital study of, 21
molecular; Ru(III) and Ru(III)—EDTA catalysed oxidation of diethylamine by, 323

Palladium
ortho-metalated Pd(II) complexes in homogeneous phase; dihydrogen reduction of nitroaromatics, alkenes, alkynes and aromatic carbonyls by, 279
stereochemical features of Pd-catalysed allylic carbonylation of acyclic terpenes, 355
sulphur-containing polymeric Pd complexes; olefinic substitution reaction catalysed by, 55
Phosphorus
accelerated decomposition of active phosphates on TiO_2 surfaces, 347
catalytic asymmetric hydrosilylation of ketones by Rh(I) complexes containing enantiomers of (*R**, *R**)-(±)-1,2-phenylenebis(methylphenylarsine) and their phsophorus isosteres, 155
effect of dibenzophosphole on catalytic activity of rhodium phosphine complexes, 79
hydrogenation of alkenes and alkynes in presence of $Ru(COD)(PMe_2Ph)_3^+$; comparison with $RuH(PMe_2Ph)_5^+$ alkyne hydrogenation catalyst, 313
Photoassisted hydrogen production
from methanol–water mixture on platinized Cr_2O_3-doped TiO_2, 43
Photochemical reduction
of water; water-soluble Wilkinson's complex as homogeneous catalyst for, 225
Photoinduced water cleavage
specific analysis of surface-bound peroxides formed during, in titanium dioxide-based microheterogeneous systems, 63
Platinum
metals in organic syntheses; hydroformylation of ethyl 3-butenoate catalysed by Pt–Sn complexes, 177
photoassisted hydrogen production from methanol–water mixture on platinized Cr_2O_3-doped TiO_2, 43
reaction of neopentane and hydrogen on oriented and non-oriented catalysts of Pt on Al_2O_3, 293
Polycyclic compounds
hydrogenation of arenes by $RhCl_3$–Aliquat® 336 catalyst; selective reduction of, 185
Polymer(s)
matrix influence on ion exchange resin-catalysed reactions, 161
olefinic substitution reaction catalysed by sulphur-containing polymeric Pd complexes, 55

Quantum chemical model
of dehydration of 2-butanol catalysed by zeolite X, 169
Quantum chemical study
of interactions of ketones with zeolites, 13

Reduction
dihydrogen, of nitroaromatics, alkenes, alkynes and aromatic carbonyls by *ortho*-metalated Pd(II) complexes in homogeneous phase, 279
photochemical, of water; water-soluble Wilkinson's complex as homogeneous catalyst for, 225
selective, of polycyclic compounds; hydrogenation of arenes by $RhCl_3$–Aliquat® 336 catalyst, 185
Resin
polymer matrix influence on ion exchange resin-catalysed reactions, 161
Rhenium
metathesis of 1,4-alkadienes over $CsNO_3$—Re_2O_7—Al_2O_3 catalyst, 369

Rhodium
-catalysed methanol carbonylation to acetic acid at low water concentrations; effect of iodide and acetate on catalyst activity and stability, 115
pentamethylcyclopentadienyl rhodium complexes with pyrazole-type ligands; hydrogenation catalysts based on, 341
$RhCl_3$–Aliquat® 336 catalyst; hydrogenation of arenes by; selective reduction of polycyclic compounds, 185
Rh(I) complexes containing enantiomers of (R^*, R^*)-(±)-1,2-phenylenebis(methylphenylarsine) and their phosphorus isoesters; catalytic asymmetric hydrosilylation of ketones by, 155
rhodium phosphine complexes; effect of dibenzophosphole on catalytic activity of, 79
soluble and zeolite-supported Rh species; hydroformylation of 1-hexene by, 243
Ruthenium
Ru-catalysed carbonylation of cyclic amines, 233
$Ru(COD)(PMe_2Ph)_3^+$; comparison with $RuH(PMe_2Ph)_5^+$ alkyne hydrogenation catalyst; hydrogenation of alkenes and alkynes in presence of, 313
Ru(III)-catalysed oxidation of secondary alcohols by *N*-methylmorpholine *N*-oxide, 203
Ru(III)—EDTA catalysed oxidation of ascorbic acid by hydrogen peroxide in aqueous solution, 139
Ru(III) and Ru(III)—EDTA catalysed oxidation of diethylamine by molecular oxygen, 323

Silicon
Co-catalysed reactions of methoxysilanes with $CO/HSiEt_3$: reaction analogous to methanol homologation, 237
influence of Si/Al ratio on catalytic properties of NiH mordenite in disproportionation of toluene, 269
Spectroscopy
application of NMR in studies of elementary interactions in catalytic oxidation reactions of hydrocarbons, 85
TPD/MS studies of interaction of simple ketones with ZSM-5 zeolites, 195
Sulphur
olefinic substitution reaction catalysed by sulphur-containing polymeric Pd complexes, 55
Surface-bound peroxides
specific analysis of, formed during photoinduced water cleavage in titanium dioxide-based microheterogeneous systems, 63
Surface species
in equilibrium, possibly common for several major catalytic processes, 383
Surfaces
TiO_2; accelerated decomposition of active phosphates on, 347
Syntheses
metals in organic; hydroformylation of ethyl 3-butenoate catalysed by Pt–Sn complexes, 177

Terpenes
acyclic; stereochemical features of Pd-catalysed allylic carbonylation of, 355
Tin complexes
metals in organic sysntheses; hydroformylation of ethyl 3-butenoate catalysed by Pt–Sn complexes, 177
Titanium
platinized Cr_2O_3-doped TiO_2; photoassisted hydrogen production from methanol–water mixture on, 43
TiO_2 surfaces; accelerated decomposition of active phosphate on, 347
titanium dioxide-based microheterogeneous sytems; specific analysis of surface-bound peroxides formed during photoinduced water cleavage in, 63
TPD
/MS studies of interaction of simple ketones with ZSM-5 zeolites, 195

Water
photoassisted hydrogen production from methanol–water mixture on platinized Cr_2O_3-doped TiO_2, 43

specific analysis of surface-bound peroxides formed during photoinduced water cleavage in titanium dioxide-based microheterogeneous systems, 63
water-soluble Wilkinson's complex as homogeneous catalyst for photochemical reduction of, 225
Wilkinson's complex
water-soluble, as homogeneous catalyst for photochemical reduction of water, 225
Zeolites
hydroformylation of 1-hexene by soluble and zeolite-supported Rh species, 243
quantum chemical model of dehydration of 2-butanol catalysed by zeolite X, 169
quantum chemical study of interactions of ketones with, 13
TPD/MS studies of interaction of simple ketones with ZSM-5 zeolites, 195
